

FATIMA SHAIKH

Software Engineer - Backend, Data Engineering & AI

fshaikh15@gmail.com | [PHONE NUMBER] | github.com/Fatimshaikh | linkedin.com/in/fatima-shaikh

SUMMARY

Software Engineer with a BS in Software Engineering, building hands-on across backend systems, data engineering, and AI-driven applications. Experience designing and deploying end-to-end systems - REST APIs, streaming and batch data pipelines, and LLM-integrated applications - using FastAPI, Kafka, Flink, dbt, Airflow, Docker, and Kubernetes.

TECHNICAL SKILLS

Backend: FastAPI, Django, PostgreSQL, SQLAlchemy, REST APIs, JWT Authentication
Data Engineering: Kafka, Apache Flink, PySpark, dbt, Airflow, Dagster, Delta Lake, Debezium (CDC)
AI: LLM-integrated applications, AI agents, Groq, Google Gemini AI, n8n automation
Infrastructure: Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD
Databases: PostgreSQL, MongoDB, Redis, DuckDB

EXPERIENCE

Backend & AI Engineering Intern - FlyRank

July 2026 - August 2026

- Backend and AI engineering track, building hands-on fluency across backend systems and applied AI engineering.

Web Developer Intern - Symits

2024

- Web development internship, building hands-on experience with real-world web projects.

SELECTED PROJECTS

E-commerce CDC Lakehouse

PostgreSQL, Debezium, Kafka, Delta Lake, dbt, Airflow, Kubernetes

- Built a production-style CDC data platform capturing live database changes, streaming through Kafka into a Delta Lake Bronze/Silver/Gold lakehouse.
- Orchestrated the pipeline with Airflow and a custom data quality gate; deployed 5 of 7 services to Kubernetes with a Jenkins CI/CD pipeline.

Flink Kafka Streaming

Kafka, Apache Flink, WebSocket, React, Docker

- Built a real-time stream processing pipeline with a live Apache Flink cluster performing windowed aggregations over Kafka event streams.
- Bridged results to a browser dashboard in real time via a FastAPI WebSocket service.

Finance PII Scrubber

FastAPI, PostgreSQL, Groq

- Built a FastAPI service that scrubs PII from financial statements using combined regex and label-based detection across multiple file formats.
- Generated AI budgeting analysis via Groq, paired with an independent non-AI ground-truth calculator to verify totals.

EDUCATION

BS Software Engineering

Usman Institute of Technology (NED Affiliated)
